SUMMARY

Frontend Developer with 2 years of experience working on web applications using React.js, JavaScript, HTML, and CSS. Experienced in building responsive user interfaces, integrating APIs, and improving application performance. Worked on reusable components, state management, and bug fixing while collaborating with developers and designers in team-based projects. Comfortable writing clean and maintainable code and always eager to learn new technologies and improve development skills.

WORK EXPERIENCE

Associate Software Engineer

Aug 2024 - Present

Softude Infotech Private Limited, Indore

- Built and maintained web application features using React.js and JavaScript.
- Connected frontend applications with REST APIs to display and update data.
- Created reusable components to reduce code duplication and simplify development.
- Used Redux Toolkit to manage application state and handle data across different screens.
- Worked with backend developers, QA engineers, and designers to implement and deliver new features.

Trainee

May 2023 - May 2024

InfoBeans Foundation

- Completed training on React.js, JavaScript, and the tools used in the development process.
- Worked with senior developers to understand project workflows, coding standards, and best practices.
- Assisted in gathering requirements, researching solutions, and preparing project documentation.
- Supported development tasks by working on small features, fixing bugs, and testing changes.

Devi Ahilya Vishwavidyalaya (DAVV), Indore

SKILLS

Technologies: JavaScript, ReactJs, NextJs, BootStrap, MUI, MySql

Tools: GitHub, GitLab, Postman, Cursor, Zoho (Project Management / Issue Tracking)

RELEVANT PROJECTS

Cost It Right (Product of Softude)

.Net, React.js

Cost It Right is a procurement and cost management platform designed to help manufacturers make better purchasing decisions and improve cost visibility. The platform simplifies procurement processes, fits into existing workflows, and has helped businesses reduce operational effort and achieve significant cost savings.

Utsav Uphaar (Gift Gallery App)

MERN

Developed an e-commerce application for gift shopping where users can browse products, add items to their cart, place orders, and make payments online. The application includes Google Sign-In for authentication, along with order management and tracking features that allow users to monitor their purchases and delivery status. Worked on building a smooth and user-friendly shopping experience while ensuring reliable performance across the application.
